

CLIMATE CORPORATION

Certificate of Climate Protection For Offsetting CO2 Emissions of the Year 2008

Information

Climate Corporation confirms the cancellation of Verified Emission Reductions (VER's) with the aim of reducing the effects of global warming. This certificate guarantees that greenhouse gas emissions are offset by an investment in a high quality emission reduction project.

Project Information

Turkey - Marmara: Gold Standard Wind Power Project

Short description

The objective of the project is to replace fossil fuel electricity generation by the installation of wind power turbines.

Project type: Renewable energy, wind

Type of certificate: VER

Quality standard

The project has been validated and verified in accordance with the VER Gold Standard.

CO2 Emission Offset

Ordered by:

GeoVille Information Systems GmbH
Museumstrasse 9-11
